

Description

Sonoff Motion Sensor Zigbee

Sonoff Motion Sensor Zigbee battery powered smart device can be placed anywhere in your home to detect motion for lighting as well as triggering alarms. Furthermore that means the sensor will send an instant alert notification to your mobile phone whenever the motion is detected if this security system is armed. However if you have a [SONOFF ZigBee Bridge](#), you can connect the sensor to it to activate Wi-Fi devices, not merely ZigBee devices.

Furthermore share control is available for multiple users to check as well as monitor your home together. Easy and tool-free installation, 3M adhesive helps saves time.

Boasts 110 degree view field and 6m detection range.

Additionally we recommend purchasing the [Motion Sensor Base](#) as an accessory add-on for the PIR3

Features

- Create smart scenes to activate Wi-Fi smart devices.
- Detect movement and trigger alert messages.
- Turn the devices on/off through your movement.
- Work with the SONOFF camera to further monitor your home.
- 6m detection distance and 110°viewing angle.
- Share the sensor to your family to keep eyes on your home.
- 3-month history records check.
- Low-battery notification.
- Quick peel and stick installation.

***Note:** Requires a wifi-to-zigbee hub to work * Please purchase the [Sonoff Zigbee Bridge](#)

**** Batteries Not Included**
