

Description

Sonoff L3 Pro Smart LED Strip

The Sonoff L3 Pro RGBIC LED strip lights can display multiple colors simultaneously. The ordinary RGB light strip can only display one color simultaneously, which is monotonous.

The newly released Sonoff L3 Pro RGBIC Smart LED Strip, every lamp bead on the L3 Pro has IC (built-in independent chip) control, and the strip lights can display multiple colors simultaneously, creating a colorful lighting atmosphere.

Whether you're camping, celebrating holidays, or decorating your room, RGBIC strip lights always bring you richer color combinations and imagination.

However there are 44 different lighting effects that are preset for your different scene needs. With the built-in high-sensitive mic, you can dance with the lights that can be synchronized with various music rhythms in music mode.

Apart from these, L3 Pro can work with Alexa, Google Assistant, and SmartThings, you can adjust the brightness and color temperature through voice. With Alexa, you can even switch the preset scene mode in one second.
