

# Description

## Sonoff Zigbee Mini-L2 (No Neutral Required)

Sonoff Zigbee Mini-L2 is 40% smaller than Zigbee Mini-L, suitable for most size boxes, and leaves more space for DIY modification.

Although ZBMINIL2 is smaller, it has many functions: no neutral wire required, two-way control, smart timer/ scene, supports two types of wall switches, etc.

## Features

- **Super Tiny Size-** The tiniest Zigbee smart switch can be easily fit in the smallest EU-type/86 type/120 type mounting box.
- **Support External Switch-** Work with different type of external switches to control your devices, like rocker light switch, push button wall switch, etc.  
No neutral wire required for easy installation & simple use.
- **Simple and Reliable-** As a Zigbee 3.0 switch, ZBMINI Extreme can combine with Zigbee hubs to form a home LAN, No longer worry about no internet, you are able to freely control the appliances normally even the light is as low as 3W, no anti-flicker module is required.
- **Application Scenes-** ZBMINI Extreme can achieve two-way control for your staircase light; set countdown/scheduled/loop timers to create your situational life; work well with Amazon Alexa and Google home to turn on/off your light by voice command; support setting the smart scene to trigger connected devices to make your life easier.
