

Description

Sonoff iHost 2GB

The best part is, The Sonoff iHost is compatible with both Wi-Fi LAN devices and Zigbee devices. You can manage up to 128 Zigbee devices, and it works seamlessly, providing you complete control over your entire house.

One of the key features of iHost is its Local Data Storage. This means that all your device data, including scene logs, operation logs, and security logs, stay completely secure and private. Everything is stored in a local database, giving you peace of mind about your data security.

Moreover, iHost comes with an Open API and Add-on integration. This means you have the freedom to customize and expand your smart home experience. Whether you want to install existing Add-ons or develop new ones, iHost supports it all. The possibilities are endless, making your smart life more enjoyable than ever before!

Say goodbye to complicated setups and unreliable connections. Embrace the power of iHost and experience a smarter, friendlier way to control your smart home devices. Get ready to enhance your home with the latest technology and create a comfortable, secure living environment.

Try The Sonoff iHost today and discover the future of smart home automation!
