WiZ LETS YOU CUSTOMIZE ROLES & ACCESS FOR MULTI-USERS

WiZ makes it easy to invite others to enjoy your smart lighting. All settings are stored on the cloud and easily shared.

You can assign Owner or Guest role to give users different levels of access to functions and Rooms.

- **Owner:** full access to settings & control remotely

- **Guest:** cannot adjust settings & can only control locally (by being connected to the same Wi-Fi network). You can set an expiry date for the access.

To share access of your WiZ Home, just generate the QR or invitation code for your invitee to scan or enter in their WiZ app.
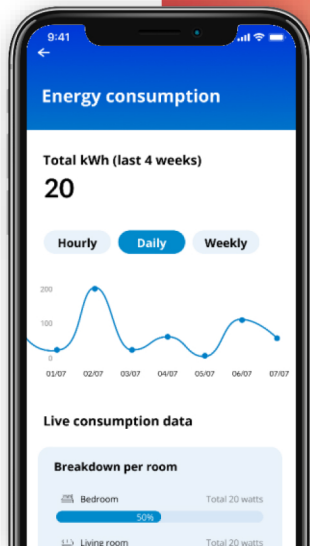

" I want to share control of the smart lights with my family and friends, but I do not want them to mess up the favorite Scenes and Schedules I've set."

This code allows anyone to join your home as a Guest.

WiZ HELPS YOU MONITOR ENERGY CONSUMPTION

- **Energy Dashboard**: Track your WiZ lights' energy use hourly or daily.

- **Estimated Consumption:** Uses laboratory data for light modes and brightness to estimate energy usage.

- **Usage Planning:** Set schedules to manage light usage and reduce energy wastage.

Remarks: 1) the Energy Consumption dashboard doesn't include Smart Plugs that don't feature power meter. 2) some WiZ lights may not report any power consumption data as the reference measurements of the older models are not complete.

WiZ SYSTEM IS PRIVACY CENTRIC

WiZ app uses anonymous sign-in

We take users' privacy seriously. We do not require email address or phone number to use WiZ app.

For sign-in, we use 3rd party Identity Providers such as Apple and Google, which will give us an external ID to associate with the WiZ User on the cloud. No personal data such email address is retrieved from the Identity Provider.*

As WiZ doesn't hold any sensitive data of you, you can stay assured that nothing important could leak.

*Personal info such as email can be processed during a customer care process or other occasion if the user voluntarily provides this to WiZ.

" I have concerns about the security of the data being collected and the hackability of the products. The connection via the Internet always involves risks."

MUSIC SYNC

Amplify your music with a dynamic lighting effects. WiZ makes your smart lights react to the rhythm of the audio by using your Smart devices' microphone.
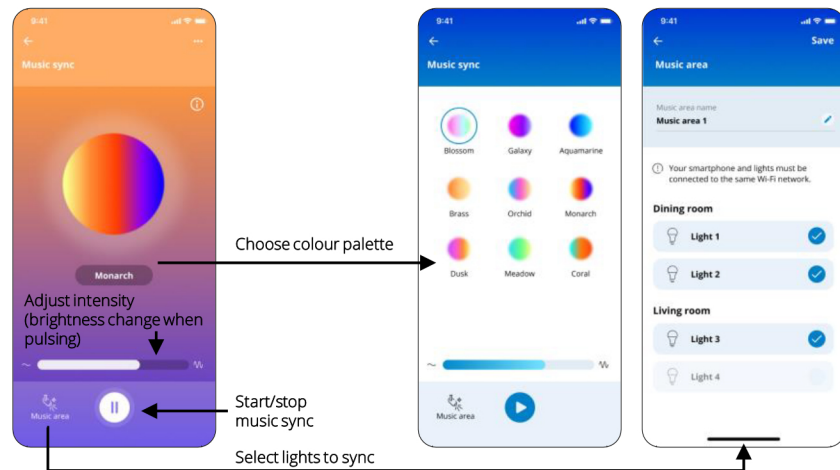

Easy to use. Your smartphone or tablet captures sound from nearby sources (speakers, TV etc.) and pulses your lights to sync with the music.

No additional control box or installation is needed.

Personalize. Use the app to adapt the light effects to your own liking (e.g. brightness, colour etc.)

Picks up sound from any sound source. The closer to the sound source, the more accurate the sound pick-up and rhythm.
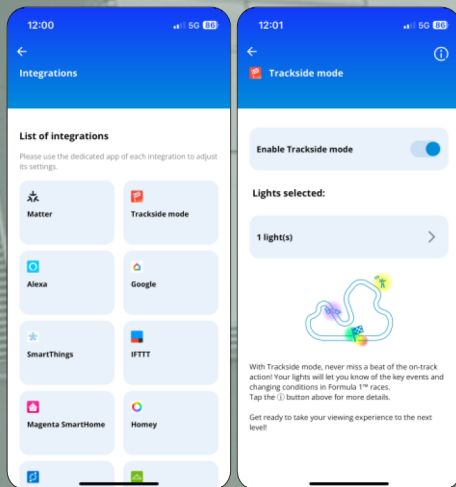

Choose your "Music Area". Where there are multiple WiZ lights in a room, you can choose which lights will respond to the music. Select as many lights as you want.

Choose colour palette

Adjust intensity (brightness change when pulsing)

Start/stop music sync

Select lights to sync

TRACKSIDE MODE

Enhance your viewing experience!
Never miss any action!

WiZ

New feature located in the integration page. Creative and fun.

Makes the colour of your lights "follow" the Formula 1 races (e.g. green, yellow, red flags, checkered flag etc.) based on external data (Details here).

Messages are sent from the Cloud to the lights (user privacy is maintained).
