Smart lighting functionalities easy to set up

Enjoy the benefits of smart features instantly, just by connecting your WiZ light to your Wi-Fi network. Control lights easily when you're away from home and scheduling lights to go on and off automatically. No need to install additional hardware such as hub or gateway!

Activate lights with motion without having sensors

WiZ's SpaceSense technology turns your lights into motion sensors. With a minimum of two WiZ lights in a room, you can activate the SpaceSense feature in the WiZ app and have lights turn on and off automatically with motion detection.

Set up lights to follow your own schedule

Automate your smart lights to follow your daily or weekly routines. Schedule your lights to turn on in the morning or before you arrive home, and to keep them off to save energy, when they are not necessary.

Create your perfect light scene

Make your own mix of different colour and white lights modes to create the perfect light ambience for your daily moment. Simply save your new Scene and select it anytime with the WiZ app or voice.

Millions of colours and changing light modes to make your day

Choose any light colour you like or simply apply a dynamic light mode that we've designed for you. Fireplace or Ocean, for example, will help you create an amazing atmosphere and lift your mood.

Set the right ambience with tunable warm to cool white light

Choose from a wide range of energising cool white to soft warm white light, or simply select from the preset modes such as Focus and Relax to create the best ambience for your activities.

Dual zone light effect in a special shape

The special shape of this light, along with our unique dual zone design lets you paint a splash of light on the wall, while lighting a soft glow on the surface where the lamp sits. Mix and match from a choice of millions of light colours or choose dynamic light modes to create Scenes that fit your mood. Winner of the iF Design Award 2022.

Control smart lighting the way you like it

WiZ enables you to control smart lighting in multiple ways. Adjust lights with your smartphone, voice, the WiZ remote control or by using the existing wall switch to toggle between two favourite modes. Works with Google Home, Alexa and Siri Shortcuts.
